◆Select and play media files and folders from your hard drive◆ With ChemPlayer, the most important software media player on the market, you can quickly and easily access all your media files, without having to go through all of your folders and search for the right one. Just add media files to the list, press the play button, and watch or listen to your favorite songs and movies as they play. You can also set up custom playlists for quick access to various collections of your media files. And it's easy to drag and drop the desired file(s) to the playlist, even through the ChemPlayer's Media browser window. ◆Play media files and folders directly from your hard drive◆ You can access and play your media files and folders directly from your hard drive by clicking on the ChemPlayer's Media browser icon. Just select the desired files and folders, and ChemPlayer will take care of the rest. Selecting a folder will also let you listen to all its files at once by simply pressing the play button. ◆Set up custom playlists◆ You can also set up custom playlists by adding, removing, and rearranging media files and folders. Just click on the media files and folders that you want to add to the playlist, then drag them to a position you want them to occupy. And you can delete a song or a whole playlist anytime. Also, add new media to your playlist by clicking on the '+' icon in the playlist's track list. ◆Browse the Internet◆ ChemPlayer also lets you browse the Internet using the Media browser window that opens up when you add media files or folders from your hard drive. Simply navigate through your website browser and listen to the media files you want. If you find a website you want to save as a bookmark for later, you can do it from ChemPlayer. ◆Save CD's or rip them from the media browser window◆ ChemPlayer also features a 'CD Ripping' option that lets you rip CD's from your CD tray, automatically locate the exact track you want to use, and rip it to your hard drive as a.wav file. You can also save the CD's you rip as.mp3 files, or, save them as.avi files, so you can burn them later and play them on your DVD-ROM. ◆Playback time options◆ You can adjust the playback time for all media files and folders through the

ChemPlayer Serial Key is a user-friendly software utility featuring numerous options and functions that are meant to make your music and video playing experience more entertaining and simple. The application displays a straight-forward interface that provides you with a tree view of the folders and files on your disk, so you can easily locate the directory containing your favorite media and add it to the playlist. The player features basic functions, namely 'Stop', 'Play / Pause', 'Next Track', 'Previous Track', 'Random Play', 'Continuous Play', 'Fast Forward' or 'Fast Reverse'. ChemPlayer supports numerous media formats, ranging from audio to video, and can even render different formats within the same playlist. Furthermore, the program provides you with a 'CD Rip' tool that enables you to extract the contents of your disc and save them to your computer. It lets you select the targeted drive, then press on the 'Rip' button, displaying a progress bar to show you how much time has elapsed and how long before you can play your files. Additionally, the application offers you web browsing capabilities, so you can access your favorite website while listening to music, or view details about a particular movie as it is being rendered in the 'MediaPlayer' section. To summarize, ChemPlayer is a comprehensive program that lets you listen to music, watch movies, rip or burn discs as well as browse the Internet, all from a single location. ChemPlayer Key Features: - Listen to your favorite music and videos on-the-go - Rip / Burn to CDs - Browse the Internet - Image viewer - Internet radio - Video player - Ringtones - Books - Notes - Sound effects - Text to speech - Convert media files - Audio flac / ogg / mp3 / wma files - Video files in mp4 / mov / avi / mpeg / 3gp - CineMenu supports 15 languages with multilanguage support. - Compatible with iPod, iPhone, Sony PSP and other brands. \* Must be iPod/iPhone/DS/PSP/Windows device connected in order to work. \* Note: iPod/iPhone/DS/PSP factory reset may be needed for this application to work \* This application is compatible with Windows Media Player 11/12/7/10 \* Note: The compatibility with WMP 8/9/10 is subjected to device on the network. \* Switch to WMP 09e8f5149f
